

Deforestation in Colombia

By: Felipe Barbosa Rojas

Index

- ◆ Explanation of the problem that is affecting Colombia (deforestation).
- ◆ References that I will use for my work.
- ◆ Explanation of my project (Theme, New forms of paintings, The space that is going to be used, materials).
- ◆ The sketch of how it will look like.
- ◆ Explanation of how the reference that I use help as a base for my project.

Explanation of the problem

- ◆ Colombia is one of the five countries with more deforestation in the world because of his annually loss of hectares. This had been caused mostly by the people that cut and also fire the trees to get resources for the wood industries and because of the land obtaining for mining, agriculture. I chose this theme for my art piece because I think is a way to make the people look what is happening in Colombia and in the whole world, also is a way to change the way of thinking of the people for them to start acting for this.

Art piece explanation

I am going to base in this two references and the theme chosen to create some art pieces which represent the problem that is happening in Colombia which is deforestation. With this art I want to make people feel what is happening to make a change in society. It also has the purpose of criticizing the felling of trees.

2D: It will be an stencil in a space full of trees like the 3 fields were i could paint trees burning and fallen because of the wood industries that are represented as a person with an axe. Also in the botom part I will show a mesage like the one of shepard to express better the people what is happening and for them to feel that they need to act.

3D: It will show in a not to big model a person cutting trees in a very grassful part and in his back I will show many papers and wood objects to show for what we are killing so many land. The Tatsuya reference help me as a base of what is going to be my desing but changing in a total way the elements that are used and also the proportion becuase my porpose is to make posible the construction of it. I will show it in the part of of leaves that is in front of the flags because its a place were many people can apriciate the model better and were I can show the identity of my theme that is deforestation.
